- ❖ Expert API Integration
- ❖ Responsive Web Design Mastery

Projects

- **Personal Website** ,https://gaurav.vercel.app/
  - My personal website highlights my programming skills and also contains the source code and website links for all my projects listed below.

- **Search Engine** (view project)–(github)
  - Fetched data from Google Search Api to search results
  - Implemented Light and Dark mode
  - Built using **React, Javascript, HTML and CSS** best practices.

- **GoPlayer Game Search Engine** (view project)–(github)
  - Fetched data from Rawg Api to find game data
  - Added state management tool **Redux, Redux-thunk** to manage game information on different pages
  - Built using **React Js, Framer-motion and Styled Components** best practices.

- **Feedback Board** (view project)--(github)
  - Constructed a robust login system utilizing NextAuth, ensuring secure and streamlined user access to the feedback board.
  - Employed AWS S3 buckets for efficient and secure storage of user-generated content, enhancing the application's data management capabilities.
  - Crafted a comprehensive feedback platform using MongoDB and Mongoose, facilitating organized and reliable storage of user feedback and suggestions.
